Profile

Engineering student at EMSI Marrakech, graduating in 2027, with full-stack and mobile experience from two Sensthings internships and freelance projects. Focus on business applications, APIs and on-device machine learning.

Projects

Neurodive | Freelance — Full-Stack Developer & Technical Lead October 2026 – Present

React, TypeScript, FastAPI, SQLAlchemy

- Developed a full-stack platform for resource and professional discovery, memberships and administration, connecting a React/TypeScript interface to a Python/FastAPI backend.
- Responsible for IT and deployment of the Neurodive platform.

MonsterGarage | Freelance April 2026 – June 2026

Python, Flask

- Built a local web application for Monster Garage / WIDINE MOTORS SERVICES in Marrakech to manage customers, vehicles, repair jobs, quotations, invoices, PDF exports and staff workflows.

Forge — Engineering Intelligence (in development)

Next.js, TypeScript, Python, FastAPI, PostgreSQL, Docker

- Designed and built a multi-tenant GitHub analytics platform covering pull requests, code reviews, CI and deployments, with signed webhooks, resumable workers and PostgreSQL row-level security.
- Implemented secure JUnit ingestion, test execution histories, pass-rate metrics and potential-flakiness analysis; automated API and UI tests with pytest, Vitest and Playwright.

Professional Experience

Mobile Development & Machine Learning Intern Summer 2026

Sensthings

- Built a Flutter/Dart module for T3-Shield combining motion detection, BLE presence estimation and on-device TensorFlow Lite inference with a rule-based fallback.
- Created a Python training pipeline and React/TypeScript dashboard connected via HTTP/WebSocket; prepared integration into an existing Flutter app.

Full-Stack Development Intern Summer 2025

Sensthings

React, TypeScript, Python, FastAPI, MySQL, WebSocket

- Developed T3-Shield's React/TypeScript frontend with analytics dashboards, regional maps, filters and data visualizations.
- Built Python/FastAPI APIs backed by MySQL for collecting and querying analysis data, statistics, regional comparisons and Excel exports.
- Implemented session-based authentication, role-based access control and WebSocket updates for dashboard data.

Education

EMSI Marrakech | Marrakech, Morocco 2022 – 2027 (expected)

Engineering Studies in Computer Science and Networks
Specialization: Digital Development and Information Systems

Skills

Frontend: JavaScript, TypeScript, React, Next.js
Backend: Python, FastAPI, Flask, Java, Spring Boot, Node.js, Express, PHP, Laravel, REST APIs
Mobile & ML: Flutter, Dart, Bluetooth Low Energy (BLE), TensorFlow Lite
Databases: SQL, PostgreSQL, MySQL, MongoDB, SQLAlchemy
Tools: Git, Docker, Playwright, HTTP, WebSocket

Languages

English: C1 | French: C1 | Arabic: Native
